

Single Source Solution for Verifications

SSNV | SSA89 Orders & SSA Maintenance

The SSA has notified us of scheduled maintenance Wednesday September 23rd-Thursday September 24th, returning online Friday September 25th.

Please note, the Social Security Number Verification service requires each agent to estimate and pre-purchase the next year's SSA-89 validation volume. Lender requests for SSA-89 verifications have exceeded expectations this year. As a result, the SSA has been experiencing interruptions in service based on volume and therefore creating a backlog of orders. We are diligently staying on top of the issues and will continue to monitor the situation for minimal impact on our clients. We apologize for the inconvenience and will update you immediately should this situation change, and we can resume processing orders as usual.

Thank you very much for trusting us with your business! Please feel free to reach out to us with any questions or concerns.
